

Help us investigate Strengths in Kids!

The Strengths research study is recruiting children 8-11 years of age either with or without ADHD and their families. Our goal is to learn more about the strengths and supportive influences that can promote academic, social, and emotional success among children. Participation involves 1-2 visits to the University of Calgary, where you and your child will engage in activities designed to identify strengths.

Participants will receive free parking and refreshments, plus a \$25 family-based gift certificate and a special toy! For more information, please contact us at (403) 210-6726 or adhdkids@ucalgary.ca, or visit our website at www.ucalgary.ca/adhdkids.
