SCIENCE SCHOOL

The Calgary Board of Education is proud to offer an alternative program which engages students in scientific inquiry, environmental education and technology applications.

The Science School features:

- in-depth study of physical science, life science and earth/sky science
- inquiry-based learning
- opportunities for off-campus study and interaction with scientists, scientific organizations and partners
- expert science teachers

The CBE Science School offers science enrichment opportunities.

Additional Program features include:

- linking literacy, mathematics, social studies and fine arts to scientific ideas
- learning ethics in science and ethical treatment of the environment
- technology to enhance instruction, inquiry, research and experimentation
- international language learning
- daily physical education
- school uniforms
- committed parent and partner support
