Re: MidSun Wireless Student Network

Dear Parents and Guardians,

A wireless student network for internet access using student owned personal electronic devices is being provided at MidSun School. The use of personal devices by students with the guidance of parents and teachers will assist in addressing individual student preferences and needs for learning.

I am pleased to announce the project is ready to launch at MidSun School soon. Access is available to students on a voluntary basis. The focus of this project is on student learning and places responsibility on students for appropriate use and behavior. Parents/guardians are encouraged to discuss the learning opportunities and the risks with their son or daughter.

Be assured that the content filtering that is normally used to filter inappropriate materials on the school's internal network will also be applied to the open access network.

As with any personal belonging that a student brings to school, the school can not be responsible for electronic devices that are lost, stolen or damaged.

This is a significant opportunity for students to personalize their learning by choosing with their parents appropriate technology for their learning needs. Thank you for your attention to this important information. For more information, visit the CBE website at <http://www.innovativelearning.ca/sec-learntech/webaware-index.asp> .

Yours sincerely,

Veronica Saretsky
Principal
