

International Certificate

engage with the global community -
discover yourself

learning | about you and your world...

The Calgary Board of Education's International Certificate is a way of recognizing and valuing the significant contributions, work and experiences of an international nature that students will accomplish throughout their CBE learning journey.

"While the rest of my class was working on essay writing, I worked with my teachers to create an integrated project that covered Math, Science, Social Studies and English. I am exploring water filtration and am creating a proposal for our Social Awareness Club to support water project in Tanzania. I wanted to know what I was talking about and to make sure we are doing the right thing. Getting grades for something I am interested in is a bonus!"

-Scott

The vision of the transformational document **Inspiring Education** has summarized "the three E's" of education for the 21st century. The CBE's International Certificate hopes to create opportunities for students to be an:

engaged thinker

who thinks critically and makes discoveries; uses technology to learn, innovate, communicate and discover; works with multiple perspectives and disciplines to identify problems and find the best solutions; communicates ideas to others, participates in society and, as a lifelong learner, adapts to change with an attitude of optimism and hope for the future.

ethical citizen

who builds relationships based on humility, fairness and open-mindedness; demonstrates respect, empathy and compassion; understands the rights and responsibilities of citizenship; respects and embraces diversity; and through teamwork, collaboration, and communication contributes fully to the community and the world.

entrepreneurial spirit

who creates opportunities and achieves goals through hard work, perseverance and discipline; strives for excellence; explores ideas and challenges the status quo; is curious, adaptable and resilient; has the courage to ask questions, listen to the answers and to act accordingly.

reflection piece	type	dates	evidence provided (i.e. Certificate/Transcript/Course Outline)	International Certificate Coordinator signature

final summative project

Once the three modules are complete, the student will submit their evidence of completion in the form of portfolios, report cards, class assignments and other formal documentation. They are then ready to create their final summative project.

This final piece is guided by the “three E’s” outlined in Alberta Education’s **Inspiring Education**. The student will combine their experience and learning to reflect on their movement towards being an engaged thinker, ethical citizen and having an entrepreneurial spirit. The student is encouraged to consider:

1 | Why was this journey important for you?

Why is second language study important? Why is studying international coursework important? Why is international experience important? Think of the larger picture – engage in a thoughtful reflection of why it is important to be an internationalized citizen in today’s world.

2 | How will you use what you experienced and learned to shape you now and in the future?

Will you study second languages further? Why or why not? Will you take international courses in your post-secondary education? Will you continue to engage in international experiences? What do you think you have gained from this journey?

The WAY a student can choose to express their learning is unlimited. Go ahead - be creative!

Possibilities may include:

- 1 | E-Portfolio
- 2 | A public presentation to classes, teachers, family and/or friends
- 3 | A multimedia project (audio, video, etc.)
- 4 | A written response (essay, poetry, journal entry, timeline, etc.)
- 5 | An artistic response (music, visual arts, dance, etc.)
- 6 | Other possibilities as proposed by the student and agreed to by the International Certificate Coordinator

“When I came into High School, I knew where I was headed. I wanted to go to the University of Toronto or the States and study medicine and eventually become a pediatrician. Then I came into contact with the International Certificate. I went out to find something “international” that I could do and was offered to translate an acupuncture document into English. I soon discovered the world is bigger than North America. I’ve discovered that medicine goes beyond our Western interpretation. Every country and every culture has their own unique approach to medicine. I’ve realized there are endless possibilities within our diverse world. The International Certificate teaches us how to interact with society, how to understand our neighbour, how to open our eyes and see how big the world around us is, how to create an unlimited world.”
