Creativity has its rewards

Women engineers are respected, recognized, and financially rewarded for their innovative thinking and creative solutions.

Make a world of difference

From small villages to big cities, organic farms to mountain tops, deep-sea labs to outer space, women engineers are going where there is the greatest need and making a lasting contribution.

Live your life, love what you do

Engineering will challenge you to turn dreams into realities while giving you the chance to travel, work with inspiring people, and give back to your community.
