Re: John G. Diefenbaker High School Wireless Student Network

Dear Parents and Guardians,

A wireless student network for internet access is being provided at John G. Diefenbaker High School. The wireless network will allow students to use personal electronic devices such as iPhones, iPods, iPads, or laptops to access the internet. With the guidance of parents and teachers, the use of personal devices by students will assist in addressing individual student preferences and learning needs.

I am pleased to announce the project is ready to launch at John G. Diefenbaker High School on May 1, 2011. Access will be available to students on a voluntary basis. The focus of this project is on student learning and students will be responsible for appropriate use and behavior. Parents/guardians are encouraged to discuss with their child/children both the learning opportunities and the inherent risks.

Be assured that the content filtering that is normally used to filter inappropriate materials on the school's internal network will also be applied to the open access network.

As with any personal belonging that a student brings to school, the school cannot be responsible for electronic devices that are lost, stolen or damaged.

This is a significant opportunity for students to personalize their learning by choosing, with their parent's, appropriate technology for their learning needs. Thank you for your attention to this important information. For more information, visit the CBE website at <http://www.innovativelearning.ca/sec-learntech/webaware-index.asp>.

Yours sincerely,

Robert Tink,
Principal
